Professional Summary

Detail-oriented Electronics and Communication Engineering undergraduate transitioning into Cybersecurity with a strong foundation in Embedded Systems, IoT, Linux, Python, and Hardware–Software Integration. Hands-on experience in Identity and Access Management (IAM), Governance Risk and Compliance (GRC), secure embedded development, firmware validation, technical documentation, and risk assessment through professional internships and cybersecurity virtual experiences. Seeking entry-level opportunities in Cybersecurity, SOC, IAM, or Product Security.

Technical Skills

- **Cybersecurity:** Identity & Access Management (IAM), Role-Based Access Control (RBAC), Least Privilege, Access Control, Risk Assessment, ITGC, Security Policies, Incident Response Fundamentals
- **Security Frameworks:** ISO/IEC 27001, NIST Cybersecurity Framework (CSF)
- **Programming:** Python, Embedded C, MATLAB, SQL (Basic)
- **Operating Systems:** Embedded Linux, Windows
- **Networking:** TCP/IP, DNS, HTTP/HTTPS, VPN, MQTT
- **Embedded Systems:** Raspberry Pi, ESP32, Arduino, Sensor Integration, Hardware Debugging
- **Protocols:** UART, SPI, I2C, LoRa
- **Tools:** GitHub, VS Code, Microsoft Office, Microsoft Excel

Professional Experience

Physitech Pvt. Ltd.

Hyderabad, Telangana

Embedded Systems Project Intern

- Developed Embedded Linux and Python applications on Raspberry Pi to support hardware–software integration and embedded automation solutions.
- Designed and implemented an intelligent Raspberry Pi-based virtual assistant by integrating speech recognition, command execution, and system automation modules.
- Conducted firmware validation, system testing, hardware debugging, and interface verification across UART, SPI, and I2C communication protocols.
- Prepared technical documentation, validation reports, and engineering test records while collaborating with multidisciplinary teams during project development.
- Successfully delivered the embedded virtual assistant with approximately 96% command execution accuracy during functional testing.

Cybersecurity Virtual Experience

Tata Consultancy Services (Forage)

Cybersecurity IAM Developer Virtual Experience

- Evaluated enterprise Identity and Access Management (IAM) strategies and designed scalable Role-Based Access Control (RBAC) models.
- Applied least privilege principles to strengthen authentication and authorization controls while documenting IAM implementation recommendations.
- Produced technical documentation describing identity lifecycle management and secure access governance.

Cybersecurity Analyst Virtual Job Simulation

- Conducted simulated risk assessments, vulnerability analysis, and security control reviews using real-world cybersecurity scenarios.
- Documented findings and recommended mitigation strategies to improve organizational security posture.

Projects

Smart Campus Energy Monitoring System

ESP32, MQTT, Python, Flask, SQLite, Chart.js

- Designed an end-to-end IoT energy monitoring solution using ESP32 sensor nodes with MQTT for secure real-time telemetry transmission.
- Developed a Python Flask backend integrated with SQLite and REST APIs, enabling live monitoring and visualization through a responsive Chart.js dashboard.

ComplianceMap – Pharma Regulatory Compliance & Audit Tracking System

- Designed a compliance tracking framework to support regulatory alignment, internal control evaluation, audit documentation, and evidence management.
- Implemented risk register management, gap analysis workflows, and interactive compliance dashboards for monitoring security and regulatory metrics.

Education

JB Institute of Engineering and Technology

Hyderabad, Telangana

Bachelor of Technology in Electronics and Communication Engineering

CGPA: 7.2/10

Expected Graduation: 2027

Sri Chaitanya Junior College

Hyderabad, Telangana

Intermediate (MPC)

Percentage: 87%

Sister Nivedita School

Hyderabad, Telangana

Matriculation (CBSE)

Percentage: 92%

Certifications

- IoT-Based System Design
- MATLAB Programming
- Cisco Cybersecurity Analyst (*In Progress*)
- Google Cybersecurity Professional Certificate (*In Progress*)

Languages

English (Professional), Hindi (Fluent), Odia (Native)
